### **Metal Finishing**

**Crest Coating - Anaheim, CA** - Powder coating, Teflon® coating, liquid paint, silk screen printing and much more... (FYI Crest currently coats catheters with Teflon® – makes them easier to use.)

Crest Coating has been in business since 1967. Coating capabilities include many specialized materials. Pretreatment is done in-house and they can also handle your pad printing, graphic Ink transfer decals, assembly and packaging. For details check out [www.CrestCoating.com](http://www.CrestCoating.com).

### **Plastic Injection Molding**

**Cal-Tron Corporation - Bishop, CA** - Quality injection molding for over 60 years.

Cal-Tron's longevity is tied to the principles by which they work; committed to superior quality and personalized service with the highest integrity. Cal-Tron is prepared to run your Nylon, ABS, Acetal, PPS, PEEK, LCP and other high performance materials. What I love about Cal-Tron is their dependability. Check their web at [www.caltroncorp.com](http://www.caltroncorp.com).

### **Plastic Reaction Injection Molding**

**Design Octaves - Soquel, CA** - A cost effective way to fulfill you low volume plastic requirements.

Design Octaves specializes in low volume molding of housings and enclosures while also specializing in quality and service. Bring it on...they love all the little nitpicky details you can load them up with, including those magnets, washers, bosses, etc., that can be imbedded during the process. For more detail on the RIM process go to [www.designoctaves.com](http://www.designoctaves.com).

### **Plastic Vacuum & Pressure Forming**

**Lormac Plastics - Escondido, CA** Over 40 years dedicated to cost effective design options.

Equipped for prototype, short or long production runs, Lormac has the capability of sharp corners, crispness of detail repeatability, reliability and low tooling and set up costs. You can visit their web site at [www.lormac.com](http://www.lormac.com).

### **Stampings - (Prototypes & Productions)**

**Vertex - Menomonie, WI** - Precision Metal Stampings; Photochemical Parts / MIM Calibration / EDM-Wire

Vertex specializes in (S-8) Mirror Finish SST 304 ANN. Part sizes range from 6" x 6" and under. Stamping thickness range from .008 to .134. You can find out more about them at [www.vertexmetalstamping.com](http://www.vertexmetalstamping.com). Another unique capability of Vertex is MIM (Metal Injection Molding) Calibration. Which is the re-sizing, re-shaping, or material removal of pre-existing MIM parts. Vertex adds the extra edge that is needed to bring those difficult MIM parts into final specifications.

### **Springs**

**Aranki Spring - Santa Fe Springs, CA** - Making all sizes of springs since 1989.

Aranki has the diversity and flexibility to fulfill any spring request. They also have the capabilities to perform secondary looping, bending and forming operations necessary to produce an infinite variety of compression, extension and torsion springs. Check out [www.springrus.com](http://www.springrus.com).

### **Screw Machine Products**

**M & R Engineering - Anaheim, CA** - Over 30 years meeting the high standards of the automotive, electronic, plastic, lock component, aerospace and fastener industries.

M & R Engineering has a proven formula for their success...Have a clear understanding of your market. Stay close to your customers; be flexible, prepared and willing to change. Understand the need for speed. For more information go to [www.m-reng.com](http://www.m-reng.com).

### **Fasteners**

**A.J. Fasteners - Anaheim, Nuts, bolts, screws, lock nuts, rivets etc...**

You have to check out AJ's web site. Too many items to even go into here. You'll find them at [www.ajfasteners.com](http://www.ajfasteners.com). AJ would like to fulfill your vendor managed fastener programs as well as your special requirements.

### **Machine Work**

**Garhauer Marine - Upland, CA** - High quality machine work.

Garhauer Marine Hardware makes their own product line but have capacity for more machine and laser work. Talk about high quality. Do you need machining or laser work for your products? Please take a look at their web site [www.garhauermarine.com](http://www.garhauermarine.com).

### **Sheet Metal**

**MMP Sheet Metal- La Habra, CA** - Established 1978. Precision sheet metal Craftsmen.

MMP Sheet Metal is known for top notch quality, dependability, excellent customer service, as well as competitive pricing. MMP's fabrication experience ranges from enclosures, panels, chassis and brackets, for electronics, power supplies, medical and dental instruments; to point of purchase displays and exercise equipment. MMP is capable of prototype and production. Preferred lead time is three to four weeks; however MMP is eager to accommodate customer requirements. Call (562) 691-1055 or fax (562) 691-2372 for information or quote request.

I am also working with two metal fab houses in LA/Orange counties that you may want to check out for **stamping, wire EDM, tube bending and welding**. Call or email me if you would like more information regarding their capabilities.

### **For your Off-Shore requirements:**

#### **Off-shore requirements:**

**Nimbus Enterprises;** for those of you who need very competitive pricing for your products. Nimbus also has non-sourcing services available off-shore such as 3<sup>rd</sup> party inspection. You can see their detailed information at [www.nimbus-sourcing.com](http://www.nimbus-sourcing.com).

Contact me by phone 949-481-3571, Fax 949-481-3568, or email [liz@lpj-associates.com](mailto:liz@lpj-associates.com), for requests for quotes.
